## Student reflection

I enjoyed growing my plants because I can learn the parts of the plant such as the leaves, roots and stem. I also know that plants are living things, so they need air, food and water. Plants can make their own food. When my plants at home became adult plants, I took the seeds from the fruits and grew them again. It is fun to learn new things.

I had to water the plants every day. At first, I was sad that they were not growing, so I gave them more water. Luckily, two of them grew. I learnt adaptability.
