Huntsman

Rainforest in a City: Flora and Fauna Identification Fun

The rainforest is home to a myriad of fascinating flora and fauna. Can you identify the flora and fauna described below?

Bat Lily	Common Flameback
Hair Spine Rattan	Paradise Tree Snake

	I can glide from tree to tree by flattening my body and concaving the underside to trap a cushion of air.	What am I? _____
	I am a woodpecker that uses my chisel-like bill to excavate nesting holes or search for wood-boring insects. My drumming can heard from afar!	What am I? _____
	Ants build nests among my interlocking spines. In Singapore, I am only found in the swamp forest.	What am I? _____
	Have you ever seen a flower like me? My 'whiskers' are actually modified leaves.	What am I? _____

Rainforest in a City: Camouflage Fun

Many animals in the rainforest are masters of disguise! Can you differentiate the animal from the flora it's hiding in? Use a coloured marker to outline the animal, and write down its name in the space provided.

Chocolate Face Crab Spider	Crab-eating Frog
Lesser Green Leafbird	Mueller's Spiny Insect
