Rainforest in a City: KWL Activity

Procedures

A. "Know" Step:

1. Brainstorm with your friends what you already know about rainforests.
2. Provide the information, as well as where and how you learnt about it.
3. Organise the ideas into general categories.

B. "Want to Learn" Step:

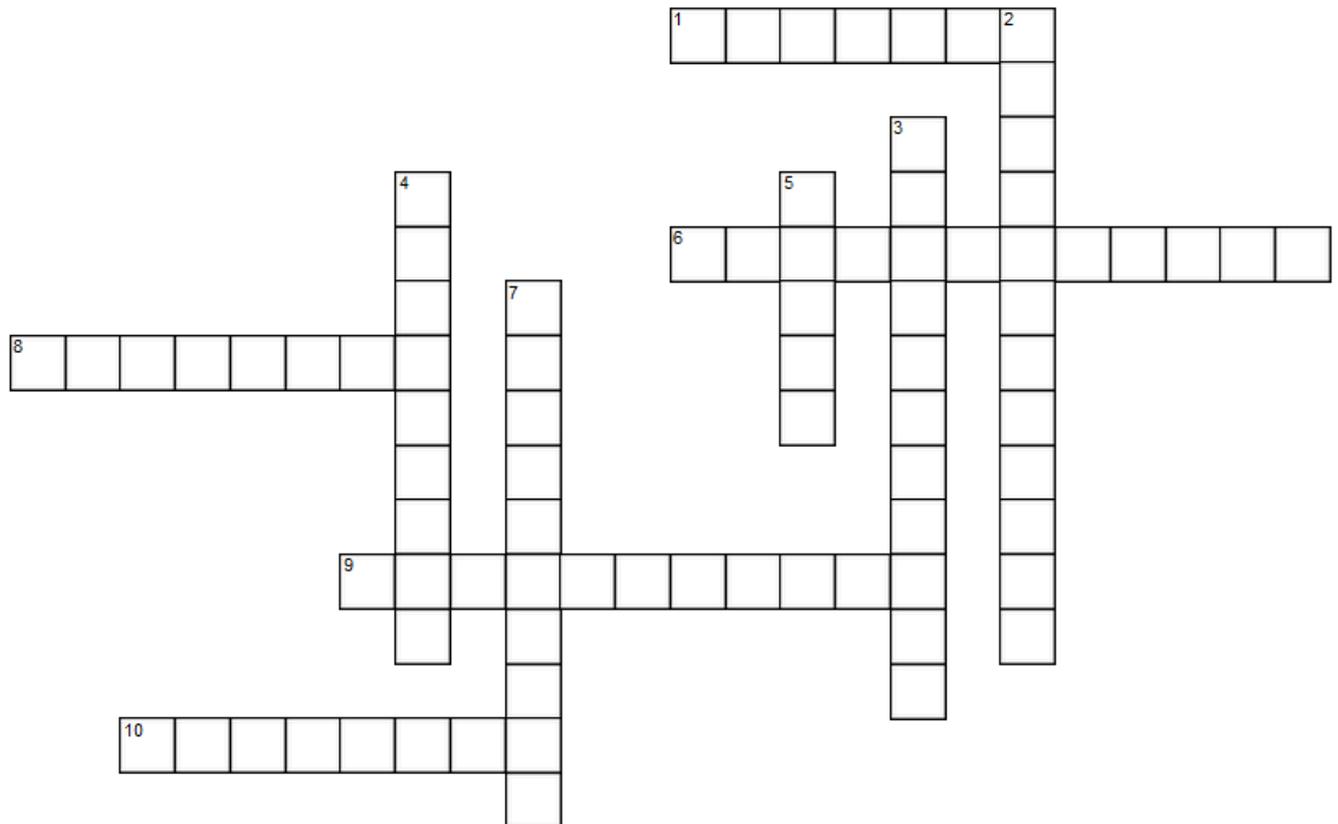

1. Discuss what you want to learn from reading the book 'Rainforest in a City'.
2. Write down specific questions about issues you are keen to find out more about.

C. "What I Learned" Step:

- Read the book 'Rainforest in a City' and write down what you have learned from it.
- Check your learning against the questions you had generated in the "Want to Learn" Step.

What do we already KNOW about this?	What more do we WANT to know about this?	What did we LEARN about this?

Rainforest in a City: Flora Identification

Did you know that Bukit Timah Nature Reserve is home to more trees than the whole of the North American continent? Here are some trees that can be found in the rainforests of Singapore. See if you can identify them.

Common Name: _____

Scientific Name: _____

Fun Fact: This tree produces an oily resin that is used for caulking boats, coating wood for weather protection, and medicinal uses.

Common Name: _____

Scientific Name: _____

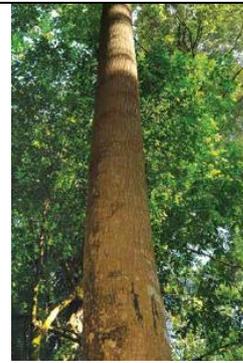

Fun Fact: Its fruits resemble small mangoes. Fat is extracted from the edible seeds for use as soap, and for wax to make candles.

Common Name: _____

Scientific Name: _____

Fun Fact: This fast-growing tree has the reputation of being the largest tree in Singapore. Its girth can exceed 6.2 m!

Common Name: _____

Scientific Name: _____

Fun Fact: Loggers avoid this tree, because its latex can cause extreme itchiness to those allergic to it.

Rainforest in a City: Fauna Identification

Here are some fauna that can be found in the rainforests of Singapore. See if you can identify them.

Common Name: _____

Scientific Name: _____

Fun Fact: This butterfly is found within forested areas in nature reserves. Its aposematic colouration of black and white warns predators that it tastes bad.

Common Name: _____

Scientific Name: _____

Fun Fact: This frog dwells among the leaf litter of primary and secondary rainforests. When disturbed, it assumes a crouched position and plays dead.

Common Name: _____

Scientific Name: _____

Fun Fact: Renowned for its brightly coloured plumage, this bird is commonly seen skulking in the undergrowth in forested areas during the migratory season.

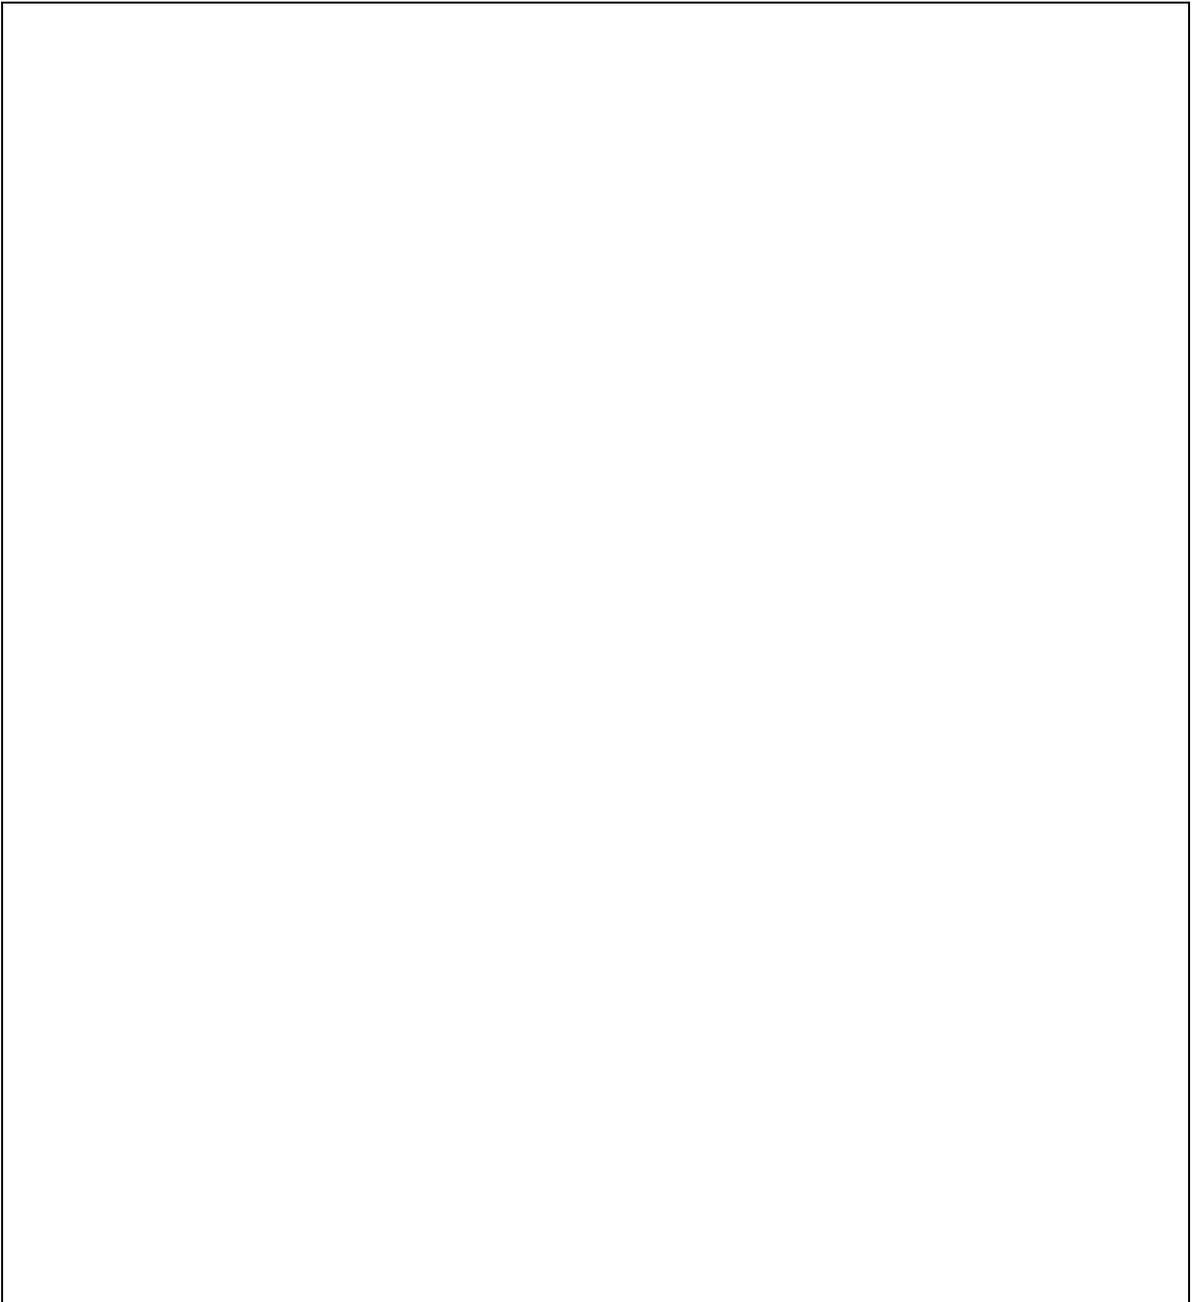

Common Name: _____

Scientific Name: _____

Fun Fact: Once thought to be extinct, this rare animal has been sighted in Central Catchment Nature Reserve, Pulau Tekong and Pulau Ubin. Nocturnal and able to climb trees, it feed on small vertebrates.

Rainforest in a City: Let's Go Green

Write a letter to a friend and suggest some ideas on how youths in Singapore can help save the rainforest plants and animals. Focus on conservation and what can be done to help preserve our rainforest and the world around us.

A large, empty rectangular box with a thin black border, intended for students to write their letter. It occupies the majority of the page below the instructions.
