

## **LICENSING CONDITIONS FOR POSSESSION OF VETERINARY BIOLOGICS**

### **LICENCE TO POSSESS VETERINARY BIOLOGICS (COMMERCIAL PURPOSES)**

- a. The licensee shall have in his possession only those veterinary biologics approved by AVS.
- b. The licensee shall have adequate facilities to store veterinary biologics and ensure that the veterinary biologics are stored under optimum conditions at all times.
- c. The licensee shall withdraw from sale any batch or lot of veterinary biologics, which have been subjected to sub-optimal storage conditions and surrender the said batch or lot of veterinary biologics to AVS for destruction.
- d. The licensee shall only sell veterinary biologics to persons who are licensed to inoculate animals with veterinary biologics or to possess veterinary biologics.
- e. The licensee shall maintain a register of all transactions of purchases and sales of veterinary biologics, and shall submit a 3-monthly return of the purchases, sales and stock balance of each type of veterinary biologics to AVS within the first ten days of the following month. The Director-General, Animal Health and Welfare, may direct the licensee to submit more frequent returns if and when he deems it necessary. The register shall be subject to verification by AVS.
- f. The licensee shall subject each batch or lot of veterinary biologics for sampling for quality control test by AVS, and shall pay the fee levied for testing, where applicable at the time of sampling. Where a batch or lot of veterinary biologic is found to be unsatisfactory, the licensee shall withdraw from sale the remainder of the batch or lot and surrender it to AVS for destruction.
- g. The licensee shall not manufacture, re-process, re-bottle or re-label veterinary biologics without the approval of AVS.

### **LICENCE TO POSSESS VETERINARY BIOLOGICS (RESEARCH AND DEVELOPMENT PURPOSES)**

- a. The licensee shall have in his possession only those veterinary biologics approved by AVS and shall keep a record of these biologics for inspection by AVS.
- b. The licensee shall not sell any of the veterinary biologics without the permission from the Director-General, Animal Health and Welfare.
- c. The licensee shall ensure that any transfer of the veterinary biologics within Singapore are carried out to a holder of the NParks/AVS Licence to Possess Veterinary Biologics.
- d. The licensee shall not dispose of any veterinary biologics unless they have been adequately treated so as to destroy any infective materials.
- e. The licensee shall not use the premises for trading in veterinary biologics (i.e. vaccines, sera, etc.).

- f. The licensee shall ensure that no infective materials are intentionally or accidentally carried out of the premises.
- g. The licensee shall inform AVS immediately should there be a loss of any veterinary biologics, e.g. due to theft.
