

Animals Around Us

Learn about the animals that share our living space in our City in Nature.
How many animals can you name?

Rock Pigeon

This bird perches on tall buildings and slopes, and makes cooing sounds.

Cat

An adult cat can jump higher than the height of a door because its back leg muscles are very strong.

Black-naped Oriole

This bird has a bright yellow body and a black 'mask' over its eyes.

Olive-backed Sunbird

The nest of this bird looks like a pouch and hangs from a tree.

Javan Myna

This bird can be seen almost everywhere in Singapore. Its eggs are blue.

Common Myna

This bird looks like the Javan Myna, but it has yellow skin around its eyes.

Dog

Dogs have a very good sense of smell. They can even tell if their owners are falling sick.

House Crow

This bird is very smart. It can turn twigs into tools to help it reach for food.

Asian Koel

The male birds call out 'ku-oo' to warn other birds not to come into its space.

Animals and Us

My Responsibility

I clean up after my pet.

- 🐾 Let's be considerate to our neighbours.
- 🐾 Everyone, including pets, wants a clean place to live in.

I keep my pet out of nature parks and reserves.

- 🐾 Pets may scare or harm wild animals.
- 🐾 Pets may leave smells that wild animals dislike.
- 🐾 Pets may carry germs that may make wild animals ill.

I make sure that my pet is vaccinated.

- ✓ I care for my pet's health.
- ✓ I protect my pet from diseases.

I will not take animals away from their homes in the wild.

- 🐾 Wild animals are not pets.
- 🐾 I cannot give them the care they need.
- 🐾 They may spread diseases to people.

I keep a safe distance from animals.

- ✓ I respect that wild animals, and stray cats and dogs need their space.
- ✓ I observe them from afar.
- ✓ I walk slowly and do not run away as they may chase after me.

I do not feed wild animals and birds.

- 🐾 Wild animals and birds, like pigeons, are not pets.
- 🐾 They know how to find their own food.
- 🐾 They know how to take care of themselves.

I wash my hands after touching my pet.

- 🐾 It may have germs that can make me or my friends and family sick.

I will keep calm if I encounter a wild animal.

- ✓ I move away slowly.
- ✓ I do not feed the animal.
- ✓ I do not do anything to stress the animal or make it feel scared.

I promise to care for the pets and wildlife in my City in Nature by practising all of the above.
