

Know 10 Trees

in Singapore!

Saga
(*Adenanthera pavonina*)
Family: Fabaceae
(Leguminosae)

The **Saga** is a hardy tree that grows very quickly and can reach up to six storeys high.

The **Saga** bears fruit pods which split to reveal deep red seeds. Each one weighs the same – four Saga seeds make up exactly one gram.

DID YOU KNOW:

In the past, **Saga** seeds were often used to measure gold and silver because of their exact weights!
