

WHAT'S BUZZING?

Search for the buzz words that are closely associated with bees using the clues below!

RAMBUTAN

A native hairy red fruit that is popularly consumed in Singapore. This plant needs pollinators like bees to flower and bear fruits.

POLLINATOR

An animal or insect that carries pollen from one part of a plant to another to fertilise plants, helping them to flower and fruit.

FRIENDLY

Not harmful

IMPORTANT

Of great value or significance

NECTAR

A sweet liquid produced by flowers to attract pollinators.

EGGPLANT

A purple fruit from the nightshade family. While they can self-pollinate, bees help by buzzing to vibrate the eggplant flower to release pollen.

HONEY

A tasty liquid made by bees using nectar collected from flowers.
